## What's New

### MSI Notebook promotes its "Warranty Extension Service" this April, 2006 to better serve its customers and increase customer satisfaction. Plus, a special complimentary gift of "MSI MP3 Player"

Nowadays, a typical day for most professionals starts with logging on their notebook. They use the notebook for email, running Microsoft Outlook, and a variety of applications that will be needed for work. In today's highly competitive business environment, working long hours in front of the notebook to meet deadlines has become a trend. Thus, notebooks that are used for long overtime hours are more prone to hardware errors and malfunctions. Because of this, highly mobile professionals are going by the after sales service the companies are providing. Most companies offer a standard 1-2 year warranty, but an extended warranty is extremely helpful to any notebook users, because it increases warranty support, offers more benefits and reduces the cost of unexpected repair charges.

### Dual Power Released from Dual-Core and Dual-Graphics MSI P4N SLI XE Released!

P4N SLI XE motherboard adopts NVIDIA's latest nForce 4 SLI XE chipset, which provides user SLI on Intel based platform at a cheaper price; the board is allocated by 2 PCI Express x16 and 2 PCI Express x1 slots, and also flexible to users to install graphic cards and related multimedia cards. Besides using 2 GeForce 6600 (or above) graphics to make SLI mode to reach great performance, users can also utilize 1 graphic in x16 bandwidth, P4N SLI XE is definitely the best choice for users who love Intel and NVIDIA technology and consider performance and flexibility at the same time.
